Code | C

```
1 /**
2  * Note: The returned array must be malloced
3  */
4  int* findClosestElements(int* arr, int
5      int left = 0;
```

Code

```
1
2 int* findClosestElements(int* arr, int arrSize, int k, int x, int* returnSize) {
3     int left = 0;
4     int right = arrSize - 1;
5
6     while (right - left + 1 > k) {
7         if (abs(arr[left] - x) > abs(arr[right] - x)) {
8             left++;
9         } else {
10             right--;
11         }
12     }
13
14     *returnSize = k;
15     return arr + left;
```
